COMPLIANCE AND AUDIT GROUP LAUNCHES EASY TRAINING PROGRAMS TO HELP MERCHANTS BECOME PCI DSS COMPLIANT

ORLANDO, Fla., July 8, 2008 – Compliance and Audit Group, a leading Qualified Security Assessor Company (QSAC) trained and certified by the Payment Card Industry Security Standards Council (PCI SSC), has developed an affordable and easy to understand content and delivery system to provide credit card merchants the education, training and validation required for compliance with the Payment Card Industry Data Security Standards (PCI DSS) through their new division, TurboPCI.

“Too many merchants are non-compliant because it is too expensive, too confusing or maybe they just don’t understand the importance of it,” said Dr. Suzanne Miller, TurboPCI senior partner. “Merchants today have too much at risk to ignore PCI compliance. Non-compliant merchants run the risk of incurring fines and even losing the privilege to accept credit /debit cards. The products we have just launched will make it easier and more affordable for all companies to become compliant and in the end, that could save their business.”

TurboPCI has developed a blended learning system to provide PCI DSS educational instruction to merchants via programmed instructional workbooks, instructor-led workshops and an online portal, TurboPCI.com.

“At TurboPCI we are at the forefront of providing the most effective, efficient and affordable solution for these frustrated merchants,” explained Dr. Miller. “We help our customers understand, implement and report PCI DSS compliance to their banks, acquiring merchant services as well as their corporate headquarters. Our people and partners are passionate about understanding and using innovative technologies to deliver progressive, cost-effective learning results.”

TurboPCI, Inc., a division of the Compliance and Audit Group, is devoted to delivering high quality Payment Card Industry Data Security Standards (PCI DSS) compliance education – in workshops, through workbooks and online. A multidimensional education enterprise headquartered in Orlando, Fla., TurboPCI helps merchants understand the requirements to protect credit card information and the steps necessary to achieve compliance by integrating today's technology with traditional proven methods of learning.
